AMERICAN JOURNAL OF HEALTH ECONOMICS

The official journal
of the American
Society of Health
Economists
(ASHEcon).
AJHE provides
a forum for the
in-depth analysis

of institutional health care systems and individual health behaviors. The journal permits high-quality review of topics, both theoretical and applied, which cannot be examined as fully by general economic publications.

Subjects of interest include competition between private health insurance providers, the impact of the Affordable Care Act, pharmaceutical regulation, medical device supply, the rise of obesity, the influence and growth of aging populations, and much more.
